INDEX

Aikaike information criterion, 114
ARMA, 48, 50, 51
ARMAX, 51
ARX, 50, 51
Autoregressive, 49, 51

Back-propagation, 219, 220
Bilinear transform, 48
Bode diagram, 116
Box–Jenkins model, 51, 53
Bussgang, 149, 150, 155, 237

Cholesky factorization, 179
Coherence, 117, 118, 146
Condition number, 29, 30, 32, 112
Convolution
  integral, 42, 43, 57, 59, 67
  sum, 43
Correlation
  autocorrelation, 16, 20, 22, 24, 109, 141
  autocorrelation coefficient, 16, 18
  autocovariance, 16, 18, 23
  cross-correlation, 18, 20, 23, 109
  cross-correlation coefficient, 19
  cross-covariance, 19, 24
  estimate
    biased, 21, 23, 109, 144
    unbiased, 21, 23
  second-order, 25, 130, 141, 142
Cross-validation, 107

Deconvolution, 142, 146, 237
Delay, 24
Difference equation, 48–50, 53
Differential equation, 52
Dimensions
  cascade models, 78
  Hammerstein cascade, 78
  kernel, 62
  Wiener model, 75
Domain, 2

Eigenvalue, generalized, 239
Ergodic, 3, 21, 22
Error surface, 208
Examples
  ankle compliance
    discrete state-space model, 54
    discrete transfer function, 49
    frequency response, 44, 118
    impulse response, 43, 110, 114
    simulated data, 103
    transfer function, 47
  fly retina,
    description, 182
    fast orthogonal algorithm, 182
    Laguerre expansion, 196

Identification of Nonlinear Physiological Systems, By David T. Westwick and Robert E. Kearney
ISBN 0-471-27456-9

© 2003 Institute of Electrical and Electronics Engineers

Examples (*Continued*)
parallel Wiener cascade, 243
principal dynamic modes, 200
separable Volterra network, 220
Volterra kernels, 182, 196, 201, 221, 222, 244

Flop, 14, 22, 61, 109, 180, 190
Fourier transform, 23, 44, 45
discrete, 22
fast, 23, 110, 145
inverse, 22, 44
Frequency response, 44–46
estimate, 116

Gaussian
linear system, 15, 67
probability density, 14
product of, 15, 68, 149
Genetic algorithm, 122
Gram–Schmidt, 171

Hammerstein cascade, 77
identification, 155, 209
Hessian, 28–30, 109, 112, 173, 213
Hysteresis, 66

Impulse response, 42, 57, 59
discrete, 43
Fourier transform, 45
state-space model, 53
transfer function, 46
Instrumental variable, 120

Jacobian, 209, 216
Hammerstein cascade, 210
LNL cascade, 217, 218
NLN cascade, 218
parallel cascade model, 219
Wiener cascade, 216, 217

Laguerre filter, 191, 232
Laplace transform, 46
inverse, 46
Linear regression, 26, 110, 120, 152, 156
IRF, 108, 109
sensitivity analysis, 110, 112, 180, 195
Volterra kernels, 171
Wiener kernels, 127
LNL cascade model, 60, 79
identification, 162, 217

Marginal kernel, 82, 165
MDL, 113, 114, 229, 238, 241
Mean-square error, 25
minimum, 27, 108, 208
normalized, 106
Model
nonparametric, 4, 40, 41, 57
parametric, 4, 46, 47
structure, 4

NLN cascade model, 83
identification, 218
Noise
measurement, 7, 24, 27, 48, 51, 53, 120
process disturbance, 7, 49–51, 53

Operator
continuous, 65
fading memory, 66
Wiener, 67, 68
Optimization
constrained, 215
Gauss–Newton, 215
gradient descent, 122, 208, 212, 220
Levenberg–Marquardt, 215, 220, 248
Newton, 214
Orthogonal, 30
basis, 40
operator, 67, 68
Orthonormal, 30
Output error model, 48, 51, 119

Parallel cascade model, 87
convergence, 89
identification, 219, 242
Wiener–Bose model, 97, 98, 100
Parameter, 4
covariance matrix, 27
insight from, 47
linear function, 26
redundant, 75, 78, 210, 214, 215, 217, 230
sensitivity, 27
space, 26, 227
vector, 4, 25–27, 121, 208, 227
Parametric optimization, 207
Polynomial, 29
Grad–Hermite, 33–35
normalized, 69
Hermite, 31, 34, 69, 150, 156
multiple-input, 33, 69, 91

orthogonal, 30, 68
power series, 29, 30, 33, 64, 65, 68, 74
Tchebyshev, 32, 35, 60, 152, 211
Power spectrum, 22, 116
averaged periodogram, 23, 145
cross-spectrum, 23, 116
Principal dynamic modes, 221
Proportionality, 6, 39, 40, 43, 58
Pseudo-inverse, 113, 114, 238, 241

QR factorization, 13, 33, 171

Random variable, 3, 14
Range, 2

Sampling interval, 43
Separable Volterra network, 219
Signal
deterministic, 2
ergodic, 25
periodic, 24
stochastic, 2, 48–50
Similarity transformation, 53, 94
Simulated annealing, 122
Smoothing filter, 143, 186
State
vector, 52
State-space model, 52, 53
Stationary, 3
Step size
adaptive, 208, 214, 215
limits, 213
Structure test
Hammerstein cascade, 78
LNL cascade, 82, 83, 139, 164
NLN cascade, 248
Wiener cascade, 75, 76, 139
Sum of squared errors, 106, 229
Superposition, 6, 39, 40, 42, 43, 57, 156
SVD, 14, 28, 33, 113
System
anti-causal, 5
causal, 5, 42, 46, 60
deterministic, 7, 10, 48
discrete-time, 48
dynamic, 5
linear, 6, 46, 48, 52
linear range, 7
noncausal, 5, 42
nonlinear, 6, 29, 57
second-order, 58
static, 5, 29
stochastic, 7, 10, 50
time invariant, 7
time-invariant, 46, 48, 52
time-varying, 7

Toeplitz matrix, 110, 142
Transfer function, 46, 144

Variance accounted for, 105
Volterra
kernel, 59, 60, 67
kernels of Hammerstein cascade, 78
kernels of LNL model, 79, 81
kernels of Wiener model, 74
kernels of Wiener series, 71
kernels of Wiener–Bose model, 94, 95
series, 58, 60, 67, 69

Wiener cascade, 73
identification, 150, 208, 216
Wiener series, 67
colored input, 73, 140, 143, 146, 147
estimation, 125, 131, 132, 134, 147
kernel, 67
kernels of LNL model, 81
kernels of Volterra series, 71
kernels of Wiener–Bose model, 95, 97
Wiener–Bose model, 57, 91
generality, 94
uniqueness, 92–94
